

SUMMARY REPORT:

1. REGION CHOSEN: I selected the South African North region which is the nearest geographical zone close to my region(Nigeria). Choosing a nearby region help reduce latency and improve performance and speed.

2. SHARED RESPONSIBILITY MODEL: The resource I deployed for this mini project is a storage account. Which operates under the Platform as a Service Model(PAAS).

In the PAAS Model, responsibilities are shared between me and Microsoft.

Microsoft Azure handles:

1. The storage facilities
2. The Network infrastructure
3. The servers and virtualization
4. Operating system and middle wares
5. Also the Runtime

While I handle:

1. Application Data
2. Account Credentials
3. Identity and Access Management (IAM)
